SEARCH

Inspection of representation of Trade Marks may, on payment of the prescribed fees, made at the Trade Marks Registry, between 9:00 a.m. to 3:00 p.m. Monday to Thursday (Except Friday from 9:00 a.m. to 1:00 p.m.).

APPLICATION NUMBERS

In each advertisement the number stated before the specification of goods indicates the number of the application.

OPPOSITION

Notice is hereby given that any person who has grounds of opposition to the registration of any of the marks advertised herein according to classes under the heading "Application Advertised before Registration" may, within two months from the date of this Journal, lodge Notice of Opposition on Form T.M-5 accompanied by the prescribed fee of Rs.6,000/-.

The period for lodging Notice of Opposition may be extended by the Registrar if he thinks so and upon such terms as he may direct.

Request for extension of time shall always bear the reference the name of prospective opponent and the number of Trade Marks, if any, to be made basis of opposition.

It is desirable that formal opposition should not be lodged until notice has been given by letter to the applicant for registration, so as to afford him an opportunity of withdrawing his application before the expense of preparing the Notice of Opposition is incurred. Failure to give such notice may be taken into account in considering any application by an opponent for an order of costs if the opposition is uncontested by the applicants.

NOTIFICATION

It is notified for general information that Form TM-1, must be completed in all respects and informations asked for must be provided. Instructions for Completions of TM-1, given on this form in the Rules should be followed. The instruction at (f) and (g) relating to user and signature are clear and noncompliance leads to over work for the Trade Marks Registry and un-necessary delay for the Applicants. Incomplete forms will not be received, and if received by POST will not be examined at their turn, till they are complete in all respects.

EXTENSION OF TIME

2. It has been observed that in opposition and Rectification cases, both the parties or their Agents/Advocates make requests on Form TM-56 for Extension of time, which are liberally granted to the parties. This practice not only delays the disposal of cases, but also results in accumulation of work. In order to discourage this practice, it is notified for general information that no unnecessary extension of time will be allowed except substantiated by cogent and convincing reasons and that mere collection of data or compilation of paper would not be sufficient reasons for asking such extension. All concerned should note and cooperate for early disposal of contested cases. Besides requests for extension of time in opposition cases must be accompanied by valid power of authorization, without which such requests are liable to be treated as un-authorized.

AUTHENTICATION OF FOREIGN DOCUMENTS AND POWER OF ATTORNEY.

3. It is notified for general information that all Foreign Documents and the Power of Attorneys shall be executed before, and authenticated by a Notary Public, or any Court, Judge, Magistrate, Consul or Vice Consul, or Representation of the Central Government as enumerated in Section 85 of the Evidence Act.

Class: 9

Goods or services: 9 Alarms; Anti-vibration mountings for electrical apparatus and instruments, scientific, nautical, surveying, photographic and cinematographic apparatus; Apparatus and analytical instruments for measuring, indicating and recording chemical properties, pH and conductive properties of solutions; Apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; Apparatus for monitoring, controlling and regulating valves

and parts of valves; Apparatus for recording, transmission or reproduction of sound or images; Apparatus for supplying power, for controlling the supply of electricity and for speed regulating; Apparatus for testing of lead acid batteries and lead acid electric cells, rectifying apparatus, inverters, converters and frequency changers, all being electric; Automatic and manual controls which monitor, adjust, and regulate a building's heating, air conditioning, and ventilation systems; Automatic controls of security access, fire management and lighting of buildings; Automatic train operation apparatus; Automatic train protection apparatus; Automatic train regulation apparatus; Automatically operated safety barriers; Calculating machines, data processing equipment and computers; Combination fluid control valve and temperature responsive control mechanism therefor, and combination temperature responsive mechanism for controlling automatic refrigerators, and electric timers for automatically effecting start of defrosting cycles; Combined electric batteries and electric battery charging apparatus being automatically operated apparatus for supplying power; Communication apparatus for communicating data between trackside apparatus or a control centre and railway vehicles; Computer based information and control systems comprising differential pressure transmitters, level transmitters, temperature transmitters, vortex meters, magnetic meters, coriolis mass flow meters, controllers and recorders for sensing, measuring and managing industrial process variables such as temperature, pressure, liquid level, flow and composition of materials; Computer hardware; Computer peripherals, industrial control computers, industrial controllers, programming workstations, operator consoles, computer programs for use in the field of industrial control, and computer systems comprising the same; Computer software and computer programs; Computers; Controllers and computers for recording industrial process variables, namely flow of materials, temperature, pressure and liquid level, electrical forces, and gas analysis, and for factory automation; Drives and inverters; Electric actuators; Electric batteries and electric accumulators; Electric positioners; Electric storage batteries, industrial battery chargers, hydrometers, hydrometer floats, thermometers and voltmeters; Electric transformers, voltage regulators, electric current meters, voltmeters, alarms and indicators, all for use in indicating variations in the condition of electric circuits from pre-set conditions; Electric vacuum cleaners for industrial use; Electrical and electronic apparatus for control or supervision of railway vehicles; Electrical and electronic apparatus for use in railway signaling; Electrical and electronic communication apparatus for use in railway signaling or for the control or supervision of railway vehicles; Electrical and electronic management, control, supervision or display apparatus for use in railway systems; Electrical apparatus for collecting, exhausting, controlling or filtering dust, powdery materials or waste products, and for air cleaning and air purifying; Electrical control apparatus and instruments; Electrically operated door closing apparatus; Electronic and electromechanical timers; Electronic and pneumatic controls for vacuum-dewatering papermaking machinery; Electronic apparatus for processing, input, output, display and communication of data and signals, parts, interconnections and fittings for the aforesaid goods; Electronic controls systems; Electronic current rectifiers, controllers, solenoids and microelectronic circuitry therefore; Electronic interlocking apparatus for use in railway systems; Electronic switch circuitry and switches for electric motors; Electronic time controllers for minimization of energy consumption and for maximization of efficiency of heat pumps; Electrostatic precipitators; Fluid flow control apparatus; Indicating and recording meters and transmitters for management, monitoring and measuring industrial process variables and for communicating with controllers and computer networks; Installations and apparatus for use as emergency and auxiliary electric power supply, all for operation by electric batteries; Instruments and apparatus for measuring pressure (using pressure sensitive and semiconductor sensors) and fluid density; Magnetic data carriers, recording discs; Peripheral apparatus for use with computers; Photo-electric apparatus, electric switches for incorporation into mats; Pneumatic control apparatus; Power supply systems adapted for the telecommunication industry; Railway level crossing systems; Railway points condition monitoring apparatus; Railway points operating machines; Railway signal lights; Railway vehicle detection apparatus; Railway vehicle detection apparatus for use in railway level crossing systems; Relays, controllers, regulators, electronic timers, electric igniters for fuel burners, electric switches, and valves operated by an electromagnet, gas and electric cooker controls, self clean oven controls, graduated switches, digital and analog timers, throttle position sensors, vacuum amplifiers, electronic governors and potentiometers, solid state relays and light dimmers, combination electric motor starting relay and temperature responsive overload controls for electric motors, motor speed controls; and renewable dials for chart recorders which monitor temperature and pressure namely charts; Scientific, nautical, surveying, electric, photographic, cinematographic, optical, weighing, measuring, signaling, checking (supervision), life-saving and teaching apparatus and instruments; Sealed recombination electric storage batteries, all for use in standby or emergency power applications; Sensing, measuring, monitoring, and data recording apparatus and instruments; Sensors; Solenoid valves; Tank level monitoring; Tapes, discs, Rooms and other data storage

media; Temperature responsive mechanisms for controlling automatic refrigerators, and controlling heaters for passenger compartments of automobiles, for controlling heaters for stoves or ovens; Thermostats, thermometers, thermocouplers, thermographs, thermostatic water mixers, thermostatic systems for automatic temperature control, thermostatic tank regulators and thermostatic safety control devices, and ignition systems for fuel burners; Trackside apparatus and train mounted apparatus for controlling railway vehicles; Valve monitoring and control apparatus; Apparatus, mainly of computers, for operation and control of stations of classification carriages and for supervision traffic railway; Control apparatus and instruments; Electrical apparatus including power rectifiers and passenger information systems; Electrically operated door closing apparatus; Electrically operated safety barriers; Electronic interlocking apparatus for use in railway systems; Electronic controls primarily for the railroad industry; namely, speed limiter testers, speed and event recorders, hump speed controllers, strobe light controller and strobe lights therefor, engineer alerter and alarms, fuel consumption measurers, speed controllers, magnetic tape players and speed indicator calibrators; Electronic equipment for rail networks, including control devices, signalling location, telecomm and and piping, protection and braking automatic; Gauges; Lightning protection devices; On-board paging systems for transit and passenger railroads comprising transmitters and receivers; Railroad signals and electrical controls therefore; Rail-highway grade crossing control systems comprising railroad highway grade crossing flashing lights gates and cantilevers. all sold as a unit; Railway points condition monitoring apparatus; Railway points operating machines; Railway vehicle detection apparatus; Telecommunications systems for railroads and public utilities comprising transmitters and receivers; Trackside apparatus and train mounted apparatus for controlling railway vehicles; All the foregoing relating to railways or railway vehicles; Computer software for use with the goods listed above; Parts and fittings for the goods listed above; being goods included in class 09.
